Instructables

April 7, 2015

[Instructables](http://www.instructables.com/) is a repository of how-to guides for making just about anything. If you want to make it yourself there's probably someone who already has and can provide the necessary steps to do it. Browse the site for ideas, search for a project or even upload one of your own! If you've been looking to get into the DIY culture Instructables is the place to start!

A list of interesting projects...
