

# HOW TO SET UP OVERDRIVE

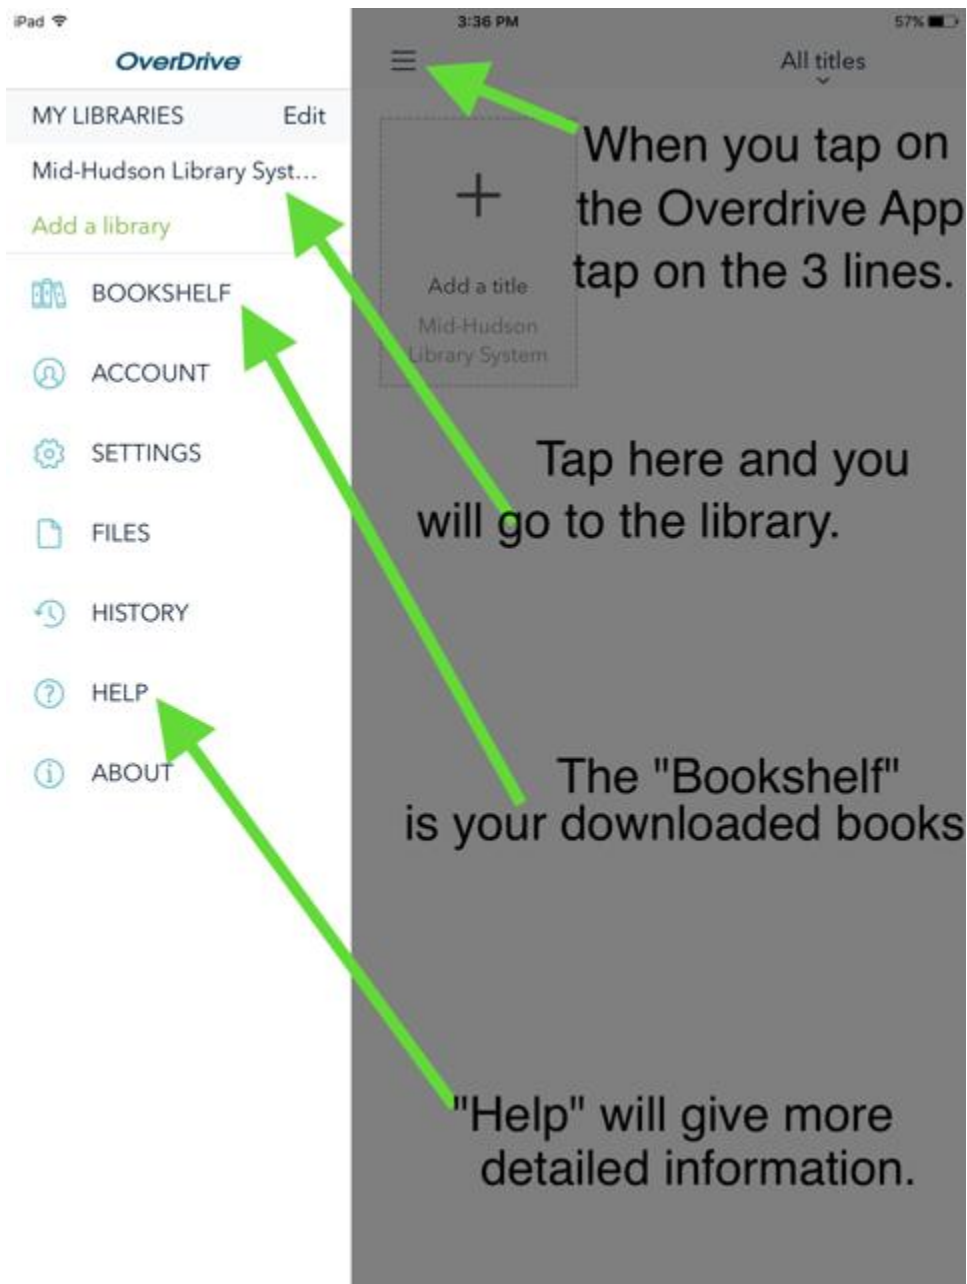

**STEP 1:** Get your library card...you will need the barcode and PIN number (this will be the only time you will need your library card).

**STEP 2:** Go to the App Store and download "OverDrive Library eBooks" (see pic below). This is a free app.

**STEP 3:** You will be asked your email address, bar code, PIN number and name of your library. That's it!

**STEP 4:** Once you have carried out the above steps the Overdrive app will provide direct access to the library, your downloaded books (Bookshelf) etc. (see the pic below).

**NOTE:**

If you use one library card you will still be able to use this system on more than one device.

Follow the same steps as set forth above. However, you both will see and access the books each other is reading via "Bookshelf " because you have one library card.

Last but not least ENJOY! You now have a library at your fingertips! Literally!  
Books can be eBooks or audiobooks.
